GenBank COI (NCBI Entrez)
BOLD COI (BCDM files)
Merge and metadata audit (0-7 score)
Trends by year and country
Sequence QC (length, identity, frame; translation)
Haplotypes, K2P, clusters, barcode gaps
Trees: 5′, 3′ and same records in both halves
Anchor check: Tetranychus 9 studies, Oligonychus 10 (evidence per record)
Identification test (leave one study out; four reference sets)
Sensitivity: thresholds, anchors, folds, species pairs
GenBank ITS2
ITS2 distances, nearest names
COI–ITS2 links (one-to-one, by key type)
